

## Stacking up solutions to parking woes

CHICAGO (AP)—A city of 2.7 million people is looking for ways to make the most of its limited parking spaces.

As a result, the city is considering a variety of solutions, from building more parking lots to using existing spaces more efficiently.

One idea is to use existing parking spaces for multiple cars. This could be done by using car lifts or other devices to stack cars on top of each other.

Another idea is to use existing parking spaces for other purposes, such as bike racks or storage.

The city is also considering building more parking lots, but this is a costly and time-consuming process.

Finally, the city is considering using existing parking spaces for other purposes, such as bike racks or storage.

By using existing parking spaces more efficiently, the city could save a lot of money and time.

Stacking cars on top of each other is one of the most efficient ways to use existing parking spaces.

Using existing parking spaces for other purposes, such as bike racks or storage, is another efficient way to use existing parking spaces.

Building more parking lots is a costly and time-consuming process, but it is still one of the most effective ways to solve the parking problem.
